

2.3.3.L. Wiregrass Strategic Planning

With input from stakeholders within the college and throughout the community, Wiregrass Georgia Technical College develops and implements a new strategic plan every five years. Designed to support and fulfill the mission of the college, the plan is aligned with the Strategic Plan of the Technical College System of Georgia. The senior staff, with reliance upon feedback from the system-wide evaluation and planning processes, updates the strategic plan on an annual basis to focus on current needs, availability of resources, and changes in operational goals and objectives.
